

Coffeelot Coffee

AI Business Intelligence & Operations Agent for Coffee Shops

- ? Combines POS, self-order, DOKU payment, inventory, booking, kitchen queue, and LLM insight.
- ? Turns daily transactions into operational decisions.
- ? Built for coffee shops and small F&B owners.

Problem

F&B owners still operate blind

- ? POS records sales but does not explain what to do next.
- ? Inventory, payment, kitchen queue, booking, and reports are disconnected.
- ? Dashboards show charts; owners still interpret everything manually.
- ? Owners need operational decisions, not just raw data.

Solution

One AI-native operating layer

- ? Commerce: POS, /chat self-order, QRIS/VA BCA/DOKU Checkout, kitchen queue.
- ? Operations: inventory, recipe stock deduction, booking seats, payment reconciliation.
- ? Intelligence: daily report, risk detection, promo, booking insight, BI pack.
- ? Autonomy: scheduler, event triggers, approval flow, /agent dashboard.

Product Demo

From order to AI insight

- ? Create order from POS or /chat customer self-order.
- ? Generate QRIS or VA BCA payment via DOKU sandbox.
- ? Reconcile payment, update kitchen queue, and deduct recipe inventory.
- ? Run 11 workflows: daily report, booking seat, menu engineering, demand forecast, kitchen SLA, and more.
- ? /agent shows structured insight cards and comparison table.

Impact + Roadmap

Beyond POS: an owner copilot

- ? Traditional POS records sales; Coffeelot explains sales and recommends actions.
- ? MVP foundation complete: POS, payment, inventory, booking, Agent Core, BI Insight Pack.
- ? Next: rate limiter, /chat UX polish, QR table generator, booking UI, BI charts, COGS/margin, POS connector.
- ? Coffeelot keeps the owner in control with human-approved actions.
